## MOTORIZED ROLLGEN - CODE FURLER

Motorized furler for free flying asymmetric sails on super yachts.

The system combines in one single mechanism the possibility of using it both as RollGen, and as furler for sails with luff hoisted on a flexible stay.

When used as RollGen®, the system allows you to furl asymmetric sails such as Asymmetric Spinnakers or Gennakers with non hoisted luff; if used as furler for sails with luff hoisted on a flexible stay, it allows you to furl sails such as Code "0", Drifter or Genoa top.

The system is driven by a hydraulic or electric motor and makes use of a special self-aligning spheric construction. It has been designed to be flush-mounted on deck.

Stay length 38 mt.

Gennaker 800 sq.m.

Perini Navi40 mt s/y "numero uno"
